Harvest for 2014 has begun! It is a bit later than normal, but Mother Nature decides when harvest will begin.

Far West - OR & WA have begun harvest and are quite early this year. They may lead the early harvest activities. Quality in OR is reported as very good and pitting well.

SW MI - A very small quantity of cherries were delivered in week one. Harvest is a bit late compared to the norm of SW MI.

PA - A few cherries were received in the 1st week of harvest. PA is also rather late compared to its norm.

Other areas - No other districts harvested in week 1.
