The Cherry Harvest for 2015 is underway! The far West and the East are leading the charge.

Far West - Both OR & WA started their harvests quite early and were active in the first week of the crop year in 2015. This follows from the very early Spring weather they had. Harvest temperatures in the west have been very high for the first week of harvest.

PA - Cherries were harvested early in PA, as well. They are expecting a larger than usual crop of cherries in 2015.

SW MI - A very small quantity of cherries were delivered in week one. Harvest is a bit late compared to the norm of SW MI

Other areas - No other districts harvested in week 1.
