### Harvest 2005:

**PA** Quality is good; volume will not reach USDA estimate.

**SW MI** quality remained good & color excellent. Harvest is almost complete. Only a little bit more this week. Probably not much more the 14 million total.

**WC** Harvest began this week. Quality and color reported as “quite” to “very” good. Early reports are mixed regarding harvest volumes compared to estimate. Recent rains will help.

**NW** Harvest started in NW MI. Quality good. Quite dry in NW MI; this may effect volume.

**WA** Harvest also began in earnest. Quality good. Volumes may be a bit lighter than anticipated.
