Total	35.6	50.0	0.0	177	249

Harvest 2008:

PA - Quality remains good; picking somewhat over estimate; will finish harvest in Wk. 3.

SW MI - Harvest remains good; quality fair to good; fruit a bit smaller than anticipated; expect a small bit more Wk. 3.

WC MI - Fruit reported as quite large, but is pitting well; quality not nearly as nice as last year; the current week should be large.

NW MI - Harvest also underway; fruit is large; pitting acceptably; quality presenting some challenges.

NY - Seem to be picking to projections; character is good, but some quality concerns.

WA - Harvesting in earnest; some quality concerns due to recent winds.
