NY production is finished. There will likely be some adjustments and/or corrections to the figure, but harvest is done.

OR has begun harvest, but the volume was too little to post. Reports are that the cherries in OR are excellent and the harvest conditions are very nice.

UT is proceeding in earnest. The fruit still looks good and is pitting well. There should be another big week in Week 6.

WA is also in the midst of harvest. The fruit looks good. Temperatures have gone down somewhat. There have been some weather events over the past few days that could impact the harvest.

WI is picking in earnest and long of estimate. The cherries still look good.
