OR is well underway with harvest. The fruit is looking quite good and quality is also good. Harvest conditions have been very good.

UT continues with its harvest. As you can see, UT has reached its estimate, yet harvest will continue at least into Week 7 if not beyond. The quality has been holding up quite well.

WA is also ongoing with harvest. The quality of the fruit is also quite good. After their 3rd week of harvest they are at 51% of estimate. It is anticipated that harvest will continue a few more weeks.

WI has finished. Fortunately for them, WI has harvested much more than had been estimated.

NW MI has a slight addition to the previously reported figures. This is a correction rather than harvest in Week 6.
