WI	<u>0.0</u>	<u>6.5</u>	<u>0.0</u>	<u>6.5</u>	<u>8.7</u>	<u>74.7%</u>
Total	9.1	228.8	0.6	229.4	266.1	86.2%

All production in the Mid-West is finished. There is a bit of production still going on in the West. There will undoubtedly be some correcting entries.

OR cherries are still coming in. The quality has been reported as quite good.

UT had a significant storm at the end of Week 6 that dropped some fruit on the ground. It is, of course, impossible to say just how much was lost.

WA is done.

From the last column above you will note that the Mid-West areas were all short of the estimates. NW MI, in particular, was down substantially. WA and UT were long of their estimates by quite a bit.
